We've been around for a while, since 1948 actually, and have seen chalkboards go from a bare necessity to a creative expression both at home and in a professional environment.

Today, chalkboards and chalk art have found its permanent place in our world. It's easy to imagine why, because sharing your message in an authentic, personal, sympathetic way and showing your creativity is a lot of fun!

The history of the brand is a chronicle marked by milestones of innovative and creative ideas for elegant dining, sophisticated cuisine, and ambitious hobby cooks. In 1946, the Spring brothers established the company which was committed to uncompromising quality and well-conceived product development. Over the years, the brand has continually developed and marketed new products that proved to be trendsetters in the history of cooking and dining culture.

Founded in 1946, TableCraft Products Company opened its doors in Chicago as an import distribution company serving the foodservice industry and continues to be a family-owned business to this day.

The company Schneider GmbH has proved to be a competent high-performance and quality-conscious manufacturer, supplier and partner in all product segments. When the company was founded in 1977 by Helga and Hans Schneider, the range of products was limited to a small specialised selection of products for the bakery sector.
